-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3728

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-12 are rejected under 35 U.S.C. 102(b or e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Wendel et al (7,240,790), Wilkman (2003/0106812), Wilkman (2002/0011424), Harper (7,163,101), Dunshee (5,487,932) or Laipply (4,696,393) alone or further in view of Reese (6,607,514) and/or Frank (cited by applicants).

Each base reference is considered to clearly indicate that the attachment of an applicator (having a substance therein to be applied to a substrate such as skin) to an inside surface of a leak-proof pouch is not the invention of the applicants of this application. Additionally, should any elements of the claims be later deemed not to be shown by any of these references, and those elements are per se conventional in the relevant art, it would have been obvious to provide any of the packages shown in the base references with the missing elements, for the purpose of improving the utility thereof.

Art Unit: 3728

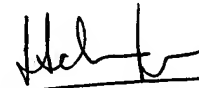

Frank (cited by applicants) appears to clearly teach the temporary attachment of a wound dressing to an inside face of a packet. So, for example, the examiner finds that it would have been obvious to attach the wound dressing of Wendel to an inside surface of its holder (if this is not shown by or obvious in view of Wendel alone), to prevent the wound dressing from being damaged during transportation of the device. Furthermore, Reese clearly teaches that it is prior art to construct an applicator such that it takes the form of a pouch of flexible and porous material holding captive a second material in which a substance to be applied to the body is impregnated. Thus it would have been obvious for the reason noted, or as an obvious choice of design, to provide the applicators of any of the prior art base references in this form.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacob K. Ackun Jr. whose telephone number is (571)272-4418. The examiner can normally be reached on Monday through Friday 8.30AM-5.00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mickey Yu can be reached on (571)272-4562. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
